TITLE INDEX

Boundary layer along the initial length of a flat plate at zero incidence with homogeneous suction (Singh and Choudhary), 59.

Boundary layers, three-dimensional periodic (Narayana and Subramanian), 243.

Cosmic ray nuclei of charge $Z \geqslant 3$ during the period of low solar activity (Anand and others), 201.

Electron spin resonance of Cr^{5+} in $CaWO_4$ (Lingam and others), 29.

ESR of CaS: Mn^{2+}: A case with zero cubic field splitting (Nair and others), 53.

Force constants, generalised mean square amplitudes of vibration shrinkage constants and coriolis coupling coefficients of GeH_3 CCH and GeD_3CCH (Venkateswarlu and others), 126.

Functions, slowly oscillating, and a generalization of quasi-monotone coefficients (Rees), 234.

H-function, on some identities of (Anandani), 89.

N-heterocycles, alkylation and aralkylation of, II, III, (Reddy and Rao), 81, 292.

Isotopes of uranium and radium in Indian rivers (Bhat and Krishnaswamy), 1.

Jet, laminar, of a compressible pseudo-plastic fluid (Kalathia and Jain), 73.

Kinetics of the decarboxylation of malonic acid in esters (Gopalan and Mathai), 92.

Kinetic study of the reaction of diols with hydrogen halides (Radhakrishnamurti and Visvanathan), 47.

Laguerre polynomials, certain series involving products of (Srivastava), 102.

Lifetimes of positrons in oxides of arsenic and antimony (Kulkarni and others), 107.

Lorentz invariance at extremely high energies, validity of (Subramanian and Vatcha), 114.

Meijer's G-function and the temperature in a non-homogeneous bar (Bajpai), 99.

Micropolar fluid, channel flow of a, heat transfer in (Renuka Rajagopalan and Bhatnagar), 165.

Oxidation of α-hydroxy acids and derivatives by Cr (VI) oxide (Sundaram and Venkatasubramanian, 157).

Piezo-rotatory coefficients and stress-induced optical activity (Ranganath and Ramaseshan), 275.

Raman and infrared spectra and normal vibrations of N-methyl propionamide and N-deuterated N-methyl propionamide (Usha Bai and Venkata Ramiah), 300.

Silicon in ferrous materials, photometric determination of, influence of temperature on (Krishnaiah and Raju), 42.

Sorption-desorption hysteresis in fibrous silica gel (Santocel C) with isomeric monohydric aliphatic alcohols (Rao and Das), 18.

Stability constants, indirect polarographic determination of, IV, 120.

Stability of superposed fluids, effect of cross-velocity on (Agrawal and Agrawal), 150.

Two-body channels in the interactions of negative pions with protons in the few GeV region (Tuli), 140.

Uranyl ion, some organic complexes of, spectral studies on, I (Sanwal and Pant), 221.

Viscous liquid, the slow stationary flow of a, about porous spheroids (Rao and Rao), 177.

X-ray K-line intensity ratios, relativistic estimates of: Calculations including retardation and screenings (Krishnan and Nigam), 189.

X-ray sources, various celestial, energy spectrum and the absolute flux of (Rao and others), 257.
